

● WHO WE ARE

We get AI working in your business before training even starts.

ClearOak & Co. is a tech-enablement partner for owners and operators. **We don't run courses.** We arrive with your hardest workflow already running on your real data, then apprentice your team until they own it.

01

We build before we walk in.

Session 01 is a demo, not a kickoff. Your hardest workflow is already running on your data the first time we sit down.

02

We train operators, not the org.

Management and key operators only. The people who own outcomes and can teach the next person without us in the room.

03

Adoption is the only outcome.

We measure success by one number: whether the workflow is still running, by your team, the week after we leave.

One operator, one weekly workflow, returns that compound.

Recently completed engagement. These are the real numbers.

1h 45m → 30m

WEEKLY CYCLE TIME

Sign & awning manufacturer. Pulling the data and doing the analysis. ~75 minutes saved every week.

~\$8,125/yr

ANNUAL VALUE RECOVERED

~65 hours back at her \$125 all-in rate. Throughput and efficiency up across the operation.

Self-led

OPERATOR RUNNING SOLO

She runs this on her own now, and is already shipping additional automations herself.

One workflow paid the engagement back. The automations she's building next are pure upside.

Let's just have a conversation.

Thirty minutes on a video call. No deck. No pitch. Tell us what's broken. We'll tell you whether we can help, usually before the call ends.
